

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

- 45 Rose Pennies, London mint.

Mr. M. Donovan continued the reading of his paper on the Universal Vitality of Matter, &c.

MAY 28TH, 1849.

REV. HUMPHREY LLOYD, D. D., PRESIDENT,
in the Chair.

DR. A. SMITH laid before the Academy a manuscript catalogue of the Tradesmen's Tokens current in Ireland in the seventeenth century, and made a few observations on their use, as illustrating family history and other matters of local interest.

He stated that his object at present was, that the list should be printed in the Proceedings, with the view of circulating it extensively, and thereby inviting the collectors of coins throughout the country to communicate to him notices of such tokens as have not come under his observation, so as to enable him, at some future time, to publish a historical and descriptive catalogue, accompanied with engravings of such of the coins as are peculiar for their devices, or calculated to assist the local historian in his inquiries. (See Appendix, No. IV.)

Professor Davy brought under the consideration of the Academy, a new and simple method he had discovered of detecting manganese in inorganic and organic bodies, as in rocks, minerals, ores, soils, and in vegetable and animal substances, and also of obtaining the salts of manganese in a pure state.

The method consists in mixing the substance to be examined with a little flowers of sulphur, and heating the mixture to a temperature at, or even lower than that of redness, when, if manganese be present, a protosulphate will be formed, the sulphur being acidified, partly at the expense of the oxide, and
